Re: Project 49624
VIA Electronic Filing and FedEx

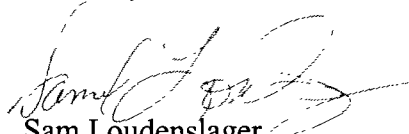

Pursuant to Sections 2.6 and 2.7 of Attachment AE of Southwest Power Pool, Inc.'s ("SPP") Open Access Transmission Tariff, http://app.spp.org/etariff_viewer.html, when a Market Participant submits a registration packet to SPP that includes load that is offered to SPP as a Demand Response Resource, or a Market Participant registers a Block Demand Response Resource, "[SPP] will notify the applicable retail provider and the relevant electric retail regulatory authority of the registration and the expected MW level of participation."

This is notification to Public Utility Commission of Texas, as the applicable relevant electric retail regulatory authority, that Voltus, Inc. has submitted a registration package to SPP that includes load that is offered to SPP as a Demand Response Resource. The loads that have been identified are:

Load	Address	MW. Offered	Retail Provider
TARG_0221_Amarillo	8201 I-40 W Amarillo, TX	0.1	XCEL Energy:Southwestern Public Service
TARG_1811_Texarkana	102 Richmond Ranch Rd Texarkana, TX	0.1	Southwestern Electric Power (AEP)
TARG_2283_Longview	3092 N Eastman Rd Ste 100 Longview, TX	0.1	Southwestern Electric Power (AEP)

Voltus, Inc. has indicated that their registration of, and participation by, these resources in the SPP Integrated Marketplace as Demand Response Resources is not precluded by the laws or regulations of the relevant electric retail regulatory authority. SPP is not liable or responsible for Market Participants participating in the Energy and Operating Reserve Markets in violation of any law or regulation of a relevant electric retail regulatory authority including state-approved retail tariffs.

Sincerely,

Sam Loudenslager
Director, Regulatory Policy
